PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 61 ISSUE 1 JANUARY 1995

WARREN L. BUTLER TRIBUTE

Dedication	1	Helga Ninnemann
Quinone binding sites on cytochrome b/c complexes	2	Karin Frank and Achim Trebst
Phytochromes: differential properties, expression patterns and molecular evolution	10	Lee H. Pratt
Some aspects of blue light research during the last decade	22	Helga Ninnemann
Polyphasic chlorophyll *a* fluorescence transient in plants and cyanobacteria	32	Reto J. Strasser, Alaka Srivastava and Govindjee
Biosynthesis of pteridines in *Neurospora crassa*, *Phycomyces blakesleeanus* and *Euglena gracilis*: detection and characterization of biosynthetic enzymes	43	Josef Maier and Helga Ninnemann
Molybdenum cofactor biosynthesis in *Neurospora crassa*: biochemical characterization of pleiotropic molybdoenzyme mutants *nit*-7, *nit*-8, *nit*-9A, B and C	54	Immanuel S. Heck and Helga Ninnemann

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Effect of thymine dimer introduction in a 21 base pair oligonucleotide	61	Flavia Barone, Adalberto Bonincontro, Filomena Mazzei, Anna Minoprio and Francesco Pedone

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

A portable instrument for measuring ground reflectance in the ultraviolet	68	B. L. Diffey, A. T. Green, M. J. Loftus, G. J. Johnson and P. S. Lee
Ozone exposure decreases UVB sensitivity in a UVB-sensitive flavonoid mutant of *Arabidopsis*	71	Mulpuri V. Rao and D. P. Ormrod
Multiple effects of fluorescent light on repair of ultraviolet-induced DNA lesions in cultured goldfish cells	79	Nobuhiro Uchida, Hiroshi Mitani and Akihiro Shima

PHOTOMEDICINE

Intracellular damage in yeast cells caused by photodynamic treatment with toluidine blue	84	Michel Paardekooper, Adriaan W. De Bruijne, John Van Steveninck and Peter J. A. Van den Broek
Photosensitization and tissue distribution studies of the picket fence porphyrin, 3,1-TPro, a candidate for photodynamic therapy	90	David S. Lawrence, Scott L. Gibson, My Lien Nguyen, Kenneth R. Whittemore, David G. Whitten and Russell Hilf
UVB-induced immune suppression and infection with *Schistosoma mansoni*	99	Frances P. Noonan and Fred A. Lewis

PHOTOSENSORY BIOLOGY

Effect of blue light and red light on the control of chloroplast acclimation of light-grown pea leaves to increased fluence rates	106	Enrique López-Juez and Martin J. G. Hughes

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 61 ISSUE 2 FEBRUARY 1995

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Sequence specificity of tetrahydrobenzopsoralen photobinding to DNA — 113 — S. Mobilio, L. Tondelli, M. Capobianco and O. Gia

The influence of molecular conformation on the stability of ultraviolet stabilizers toward direct and dye-sensitized photoirradiation: the case of 2-(2'-hydroxy-5'-methylphenyl) benzotriazole (TIN P) — 118 — Javier Catalán, Juan C. Del Valle, Fernando Fabero and Norman A. Garcia

Photoreactivity of biologically active compounds. VIII. Photosensitized polymerization of lens proteins by antimalarial drugs *in vitro* — 124 — Solveig Kristensen, Ren-Hong Wang, Hanne Hjorth Tønnesen, James Dillon and Joan E. Roberts

Effect of aggregation on the hematoporphyrin-sensitized production of singlet molecular oxygen — 131 — C. Tanielian and G. Heinrich

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Assessment of genotoxicity and mutagenicity of 1,2-dioxetanes in human cells using a plasmid shuttle vector — 136 — Steffen Emmert, Bernd Epe, Chantu R. Saha-Möller, Waldemar Adam and Thomas M. Rünger

Molecular cloning of the human gene *SUVCC1* associated with the repair of nondimer DNA damage induced by solar UV radiation — 142 — Barry S. Rosenstein, Charles A. Vaslet and Rebecca B. Rosenstein

Detection of UVR-induced DNA damage in mouse epidermis *in vivo* using alkaline elution — 149 — Judith S. Kinley, Gunnar Brunborg, Johan Moan and Antony R. Young

Ozone and ultraviolet-B irradiances: experimental determination of the radiation amplification factor — 159 — Mario Blumthaler, Michael Salzgeber and Walter Ambach

Correlation of UVC and UVB cytotoxicity with the induction of specific photoproducts in T-lymphocytes and fibroblasts from normal human donors — 163 — Peter H. Clingen, Colin F. Arlett, Jane Cole, Alastair P. W. Waugh, Jillian E. Lowe, Susan A Harcourt, Nadezda Hermanova, Len Roza, Toshio Mori, Osamu Nikaido and Michael H. L. Green

Photorepair of nonadjacent pyrimidine dimers by DNA photolyase — 171 — Sang-Tae Kim and Aziz Sancar

PHOTOSYNTHESIS AND PHOTOCONVERSION

Near-infrared Fourier-transform Raman study of chlorophyll *a* in solutions — 175 — H. Sato, K. Okada, K. Uehara and Y. Ozaki

Inhibition of oxygen evolution in chloroplast Photosystem II by the protein-modifying agent tetranitromethane — 183 — Yves Gingras, Johanne Harnois, Geneviève Ross and Robert Carpentier

PHOTOMEDICINE

The effect of irradiance on virus sterilization and photodynamic damage in red blood cells sensitized by phthalocyanines — 190 — E. Ben-Hur, N. E. Geacintov, B. Studamire, M. E. Kenney and B. Horowitz

Efficacy of photodynamic therapy on original and recurrent rat mammary tumors — 196 — Scott L. Gibson, My Lien Nguyen, Thomas H. Foster, Geoffrey White and Russell Hilf

Action spectrum for erythema in humans investigated with dye lasers — 200 — Angelika Anders, Hans-Jürgen Altheide, Marita Knälmann and Hagen Tronnier

PHOTOSENSORY BIOLOGY

Inhibition of light-dependent photomorphogenesis of sporangiophores from *Phycomyces blakesleeanus* by application of pteridine biosynthesis inhibitors — 206 — Josef Maier and Helga Ninnemann

Circadian rhythm of *Robinia pseudoacacia* leaflet movements: role of calcium and phytochrome — 210 — Luis Angel Gómez and Esther Simón

RAPID COMMUNICATION

Temperature dependence of chlorophyll fluorescence from the light harvesting complex II of higher plants — 216 — Alexander V. Ruban, Jan P. Dekker, Peter Horton and Rienk van Grondelle

Book Review — 222

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 61 ISSUE 3 — MARCH 1995

INVITED REVIEW

Solar ultraviolet radiation and the risk of infectious disease: summary of a workshop — 223 — Robert S. Chapman, Kevin D. Cooper, Edward C. De Fabo, John E. Frederick, Kirk N. Gelatt, Sue Postle Hammond, Peter Hersey, Hillel S. Koren, Ronald D. Ley, Frances Noonan, George M. Rusch, Alain Sarasin, MaryJane Selgrade, Igor Sobolev, Brian J. Ward and Thomas E. Werkema

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

A scalar irradiance fiber-optic microprobe for the measurement of ultraviolet radiation at high spatial resolution — 248 — Ferran Garcia-Pichel

Reactivity of singlet oxygen toward large peptides — 255 — Albert Michaeli and Jehuda Feitelson

Kinetic characterization of the redox components in solubilized membranes from porcine neutrophils: reduction with dithionite and photoexcited NAD(P)H — 261 — Yutaka Orii, Toshiaki Miki and Katsuko Kakinuma

Photochemistry of 2-mercaptopyridines. Part 3. EPR study of photoproduction of hydroxyl radicals by *N*-hydroxypyridine-2-thione using 5,5-dimethyl-1-pyrroline *N*-oxide in aqueous solutions — 269 — Krzysztof J. Reszka and Colin F. Chignell

Changes in transmission characteristics of polymethylmethacrylate and cellulose (III) acetate during exposure to ultraviolet light — 276 — Steef F. Steeneken, Anita G. J. Buma and Winfried W. C. Gieskes

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Unique DNA repair property of an ultraviolet-sensitive (*radC*) mutant of *Dictyostelium discoideum* — 281 — Kumio Okaichi, Toshio Mori, Makoto Ihara and Takeo Ohnishi

Two genes contribute to different extents to the heme oxygenase enzyme activity measured in cultured human skin fibroblasts and keratinocytes: implications for protection against oxidant stress — 285 — Lee Ann Applegate, Alexandre Noël, Glenn Vile, Edgar Frenk and Rex M. Tyrrell

PHOTOSYNTHESIS AND PHOTOCONVERSION

Resolution of spectral and lifetime heterogeneity of tryptophan fluorescence in bacteriorhodopsin — 292 — Mita Roy and N. Periasamy

The structure of phycobilisomes in mutants of *Synechococcus* sp. strain PCC 7942 devoid of specific linker polypeptides — 298 — R. P. Bhalerao, J. L. Collier, P. Gustafsson and A. R. Grossman

PHOTOMEDICINE

Cis-urocanic acid synergizes with histamine for increased PGE_2 production by human keratinocytes: link to indomethacin-inhibitable UVB-induced immunosuppression — 303 — Aleksandra Jaksic, John J. Finlay-Jones, Christopher J. Watson, Lyn K. Spencer, Irma Santucci and Prue H. Hart

RAPID COMMUNICATION

Unusually high affinity of Zn(II)-tetradibenzobarrelenooctabutoxyphthalocyanine for low-density lipoproteins in a tumor-bearing mouse — 310 — M. Soncin, L. Polo, E. Reddi, G. Jori, B. D. Rihter M. E. Kenney and M. A. J. Rodgers

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 61 ISSUE 4 — APRIL 1995

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Use of tris (2,2′-bipyridine) ruthenium(II)dication in a novel method for the determination of singlet oxygen reaction rates: application to studies of gelatin — 313 — Peter Douglas, Philippa C. Evans and Kevin Henbest

Fluorescence of tyrosine and tryptophan in proteins using one- and two-photon excitation — 319 — Borys Kierdaszuk, Ignacy Gryczynski, Anna Modrak-Wojcik, Agnieszka Bzowska, David Shugar and Joseph R. Lakowicz

Trapping of nitric oxide formed during photolysis of sodium nitroprusside in aqueous and lipid phases: an electron spin resonance study — 325 — Ravinder Jit Singh, Neil Hogg, Frank Neese, Joy Joseph and B. Kalyanaraman

Selective DNA thymine dimerization during UVA irradiation in the presence of a saturated pyridopsoralen — 331 — Lidia Andreu Guillo, Jocelyne Blais, Paul Vigny and Annick Spassky

Furocoumarin-photosensitized hydroxylation of guanosine in RNA and DNA — 336 — Wayne G. Wamer, William C. Timmer, Rong Rong Wei, Sharon A. Miller and Andrija Kornhauser

Phthalocyanine fluorescence at high concentration: dimers or reabsorption effect? — 341 — S. Dhami, A. J. de Mello, G. Rumbles, S. M. Bishop, D. Phillips and A. Beeby

On the charge-transfer pathway in the merocyanine 540 triplet state quenching by nitroxyl radical — 347 — M. Hoebeke and A. Van de Vorst

Singlet oxygen luminescence spectra: a comparison of interferometer- and grating-based spectrometers — 350 — Jurina M. Wessels, Paul Charlesworth and Michael A. J. Rodgers

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Reversion profiles of coolwhite fluorescent light compared with far ultraviolet light: homologies and differences	353	Thomas A. Cebula, Erik N. Henrikson, Philip E. Hartman and William H. Biggley
Using cell-fractionation and photochemical crosslinking methods to determine the cellular binding site(s) of the antitumor drug DMP 840	360	Pradeep K. Chatterjee and Nat L. Sternberg
Formation of protein-bound 3,4-dihydroxyphenylalanine in collagen types I and IV exposed to ultraviolet light	367	Yoji Kato, Takashi Nishikawa and Shunro Kawakishi
Induction of cyclobutane pyrimidine dimer photolyase in cultured fish cells by fluorescent light and oxygen stress	373	Hiroshi Mitani and Akihiro Shima
The effects of multiple UV exposures on HIV-LTR expression	378	Steven Schreck, John Panozzo, Jeffrey Milton, Claudia R. Libertin and Gayle E. Woloschak

PHOTOSYNTHESIS AND PHOTOCONVERSION

Inactivation of the acceptor side and degradation of the D1 protein of photosystem II by singlet oxygen photo-generated from the outside	383	Soon Kyu Chung and Jin Jung

PHOTOMEDICINE

Inhibition of the ATPase activity of p-glycoprotein by porphyrin photosensitization of multidrug-resistant cells *in vitro*	390	Scott L. Gibson, Marwan K. Al-Shawi, Alan E. Senior and Russell Hilf
Distribution of temoporfin, a new photosensitizer for the photodynamic therapy of cancer, in a murine tumor model	397	Robin Whelpton, Adina T. Michael-Titus, Sukhbinder S. Basra and Michael Grahn
Analysis of viral DNA, protein and envelope damage after methylene blue, phthalocyanine derivative or merocyanine 540 photosensitization	402	Hideki Abe and Stephen J. Wagner
Sensitivity of *Porphyromonas* and *Prevotella* species in liquid media to argon laser	410	Clay A. Henry, Mel Judy, Barbara Dyer, Martin Wagner and James L. Matthews
Time-dependent photodynamic damage to blood vessels: correlation with serum photosensitizer levels	414	Fernando A. Menezes da Silva and E. L. Newman
Sensitivity of activated murine peritoneal macrophages to photodynamic killing with benzoporphyrin derivative	417	David W. C. Hunt, Hui-Jun Jiang, Julia G. Levy and Agnes H. Chan

PHOTOSENSORY BIOLOGY

A method for the electrochemical initiation of the *in vitro* bacterial luciferase reaction	422	Hajime Karatani, Takahiro Shizuki, Rozana Halon and Eiichiro Nakayama
Book Review	429	

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 61 ISSUE 5 MAY 1995

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

(1-Pyrenyl)methyl carbamates for fluorescent " caged " amino acids and peptides 431 Shigeto Okada, Senichi Yamashita, Toshiaki Furuta and Michiko Iwamura

Theoretical investigation of excimer and exciplex states of uracil and halogen derivatives: effect of nonparallelism of bases 435 Vera I. Pechenaya, Victor I. Danilov, Oleg N. Slyusarchuk and James L. Alderfer

Photophysics of the fluorescent Ca^{2+} indicator Quin-2 442 Viviane Van den Bergh, Noël Boens, Frans C. De Schryver, Jacques Gallay and Michel Vincent

Photophysical studies on human retinal lipofuscin 448 Elizabeth R. Gaillard, Stephen J. Atherton, Graig Eldred and James Dillon

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Ultraviolet-induced cell death is independent of DNA replication in rat kangaroo cells 454 Eliane N. Miyaji and Carlos F. M. Menck

Preferential inhibition of nucleosome assembly by ultraviolet-induced (6-4)photoproducts 459 Hideki Matsumoto, Akira Takakusu, Toshio Mori, Makoto Ihara, Takeshi Todo and Takeo Ohnishi

Photoinactivation (365 nm) of vaccinia and herpes simplex viruses induced by a new built-in DNA photosensitizer: 4-thiothymidine 463 Arban Domi, Martchela Siromachkova, Jean-Louis Fourrey, Alain Favre and Georges Beaud

On the induction of protective responses in *Salmonella typhimurium* strain TA1535/pSK1002 by UVA (365 nm) 471 Md. S. Rahman, Biplab Bose and S. N. Chatterjee

A multitherapy resistance factor from melanoma reveals that killing by near UV is different from genotoxic agents 479 Helene Z. Hill, George J. Hill, Krystyna Ciezska, Michael Azure, Indu Chowdhary and Robert M. Sayre

Induction of slowly developing alkali-labile sites in human P3 cell DNA by UVA and blue- and green-light photons: action spectrum 484 Jennifer G. Peak and Meyrick J. Peak

PHOTOMEDICINE

Isolation of mutants of the fungus *Cercospora nicotianae* altered in their response to singlet-oxygen-generating photosensitizers 488 Anne E. Jenns, Donna L. Scott, Edmond F. Bowden and Margaret E. Daub

Local neurotoxicity of hematoporphyrin derivative following intracerebral injection 494 David P. Noske, Wouter Kamphorst, John G. Wolbers and Henricus J. C. M. Sterenborg

Targeting of phototoxic drugs to antigen-specific T lymphocytes *in vitro* using antigen-presenting cell membranes 499 Nan-Hua Chang, David C. Rayner and Joan M. Boggs

On the source of the oscillations observed during *in vivo* zinc phthalocyanine fluorescence pharmacokinetic measurements in mice 506 Eva F. Gudgin Dickson, Hugh Holmes, Giulio Jori, James C. Kennedy, Pierre Nadeau, Roy H. Pottier, Francesca Rossi, David A. Russell and Glenn E. Weagle

PHOTOSENSORY BIOLOGY

Retinylidene-opsin Schiff base chromophores and their accessibility to water 510 F. I. Hárosi and C. Sándorfy

Blue light perception by endogenous redox components of the plant plasma membrane 518 Han Asard, Nele Horemans, Winslow R. Briggs and Roland J. Caubergs

RAPID COMMUNICATION

The role of transferrin receptor (CD71) in photodynamic therapy of activated and malignant lymphocytes using the heme precursor ∂-aminolevulinic acid (ALA) 523 K. Rittenhouse Diakun, H. van Leengoed, J. Morgan, E. Hryhorenko, G. Paszkiewicz, J. E. Whitaker and A.R. Oseroff

PHOTOCHEMISTRY AND PHOTOBIOLOGY

VOLUME 61 ISSUE 6 JUNE 1995

INVITED REVIEW

Novel therapeutic and diagnostic applications of hypocrellins and hypericins 529 Zhenjun Diwu

PHOTOCHEMISTRY, PHOTOPHYSICS AND PHOTOTECHNOLOGY

Photochemical linkage of antibodies to silicon chips 540 Gajendran Sundarababu, Hui Gao and Hans Sigrist

Photochemisty of acetylenic ketones in micellar solutions as studied by product-yield-detected ESR and transient absorption techniques 545 Nicolai E. Polyakov, Masaharu Okazaki, Haruhiko Fukaya, Yoshihisa Fujiwara and Yoshifumi Tanimoto

Mechanism of photooxygenation of the Cd (II) complex of pyropheophorbide *a* methyl ester 552 Christophe Curty, Norbert Engel, José Iturraspe and Albert Gossauer

Kinetics and mechanism of photocycloaddition of deoxyuridines to 2,3-dimethyl-2-butene 557 Naoki Haga, Yasunao Kuriyama, Hiroaki Takayanagi, Haruo Ogura and Katsumi Tokumaru

Photo-CIDNP study of pyrimidine dimer splitting I: reactions involving pyrimidine radical cation intermediates 563 Petra J. W. Pouwels, Rosemarie F. Hartman, Seth D. Rose and Robert Kaptein

Photo-CIDMP study of pyrimidine dimer splitting II: reactions involving pyrimidine radical anion intermediates 575 Petra J. W. Pouwels, Rosemarie F. Hartman, Seth D. Rose and Robert Kaptein

193 nm light induces single strand breakage of DNA predominantly at guanine 584 T. Melvin, M. A. Plumb, S. W. Botchway, P. O'Neill and A. W. Parker

Photoluminescent properties of octadecylrhodamine B in micelles of low-molecular-weight detergents and water-soluble triblock copolymers — 592 — Kenichi Nakashima, Yoshinori Fujimoto and Takayuki Anzai

Exploratory photochemisty of 5-azido-8-alkoxy–substituted psoralens free and bound to DNA — 600 — Tongqian Chen, Jacek Michalak and Matthew S. Platz

ENVIRONMENTAL PHOTOBIOLOGY AND UVR EFFECTS

Genetic and molecular analyses of UV radiation-induced mutations in the *fem-3* gene of *Caenorhabditis elegans* — 607 — Phil S. Hartman, Daniel De Wilde and Vangipuram N. Dwarakanath

Behavior outdoors and its effects on personal ultraviolet exposure rate measured using an ambulatory datalogging dosimeter — 615 — B. L. Diffey and P. J. Saunders

PHOTOSYNTHESIS AND PHOTOCONVERSION

Effects of short pulses of blue light on the alkalinization associated with the uptake of NO_3^- and Cl^- by the green alga *Monoraphidium braunii* and related action spectra — 619 — Federico G. Witt and Pedro J. Aparicio

Automated mechanical stimulation and measurement of bioluminescence in marine dinoflagellates — 627 — Hans-Christian Stolzenberg, Günther Kalnowski and Wolfgang Dott

PHOTOMEDICINE

Uptake kinetics and intracellular localization of hypocrellin photosensitizers for photodynamic therapy: a confocal microscopy study — 632 — Gerald G. Miller, Kevin Brown, Ronald B. Moore, Zhenjun J. Diwu, Jixiang Liu, Liren Huang, J. William Lown, David A. Begg, Vera Chlumecky, John Tulip and Malcolm S. McPhee

Spectroscopic and microscopic characteristics of human skin autofluorescence emission — 639 — Haishan Zeng, Calum MacAulay, David I. McLean and Branko Palcic

Interactions between *N*-aspartyl chlorin e6, detergent micelles and plasma lipoproteins — 646 — David Kessel

Dual role of melanins and melanin precursors as photoprotective and phototoxic agents: inhibition of ultraviolet radiation-induced lipid peroxidation — 650 — Stefan Schmitz, Panakkezhum D. Thomas, Theresa M. Allen, Mark J. Poznansky and Kowichi Jimbow

The effect of ALA and radiation on porphyrin/HEME biosynthesis in endothelial cells — 656 — Dan He, Susana Behar, Nakao Nomura, Shigeru Sassa and Henry W. Lim

Contents, Vol. 61 — i

Author Index, Vol. 61 — xi

Subject Index, Vol. 61 — xiv
